EDUCATION

Vanderbilt University, School of Engineering - Cumulative GPA: 3.57

Nashville, TN

Bachelor of Science in Computer Science and Mathematics

Expected: May 2026

Relevant Coursework: Data Structures and Algorithms, Programming Languages, Operating Systems, Linear Algebra

TECHNICAL SKILLS

- **Languages:** Java, Python, Swift, C++, C, JavaScript, Kotlin, Racket, Prolog, Ruby, SQL, Bash
- **Frameworks/Libraries:** React.js, Angular, Next.js, CoreML, PyTorch, NumPy, Linux, Confluence, JIRA, TKinter
- **Certifications:** Back-End Development and APIs w/ FreeCodeCamp, Software Engineering Simulation w/ JPMorgan

EXPERIENCE

Apple

Cupertino, CA

Software Engineering Intern

June 2025 – Present

Trane Technologies | C, Ruby, Python, JavaScript, Selenium

Tyler, TX

Software Engineering Intern

May 2024 – Aug. 2024

- Created an application that allows employees to automatically upgrade and downgrade multiple indoor/outdoor units to any version simultaneously cutting time spent on manual labor in half
- Implemented logging to track user actions to better debugging, analytics and CUJ insights which was used to improve application behavior and test scenarios
- Introduced unit tests with ~90% coverage ensuring application reliability and engineer confidence in our logic
- Implemented automation scripts using Python to enhance and test system efficiencies in the “Technician App”, reducing manual input time by more than 50% and improving system response times by 25%
- Researched and designed the integration of the next-generation user interface framework by analyzing alternatives to help save the company over \$1,000,000/annually in revenue

PROJECTS

Postman Clone | Next.js, Google Auth, Tailwind CSS, MongoDB

[Github](#) | [View Project](#)

- Developed a Postman-like API testing web application using Next.js, enabling users to view real-time API responses
- Optimized API response viewer to display formatted JSON/XML data, response metadata, and error handling
- Integrated MongoDB for dynamic storage of API requests and Google Auth for secure authentication/streamlined login

Tic-Tac-Toe AI | Swift, CoreML, PyTorch, NumPy, AVFoundation, Core Data

[Github](#) | [View Demo](#)

- Developed a Swift based Tic-Tac-Toe application allowing the user to play against a friend or the algorithm
- Utilized PyTorch to generate over 19,000 data points used for the [TicTacToeAI Model](#) via CreateML Tabular Classifier
- Implemented the MiniMax Algorithm to generate accurate data points and the RandomForest Algorithm for training
- Currently working on storing data via Core Data to help gather more data points as players play the game

LEADERSHIP

National Society of Black Engineers

Nashville, TN

Vice-President

Apr. 2024 – Present

- Led the development and implementation of the chapter’s strategic plan, resulting in a 25% increase in membership and a 15% increase in active member participation over the past academic year.
- Coordinated with university administration and external partners to secure \$20,000 in sponsorships and grants, funding various chapter activities such as workshops, networking events, and community outreach programs.

Google Developer Student Group

Nashville, TN

Social Media Lead

Sept. 2022 – Apr. 2023

- Managed the Google Developer Student Group’s Instagram account and GroupMe platform, delivering timely and engaging updates for all events, resulting in a 30% increase in member participation over eight months.
- Spearheaded event promotion efforts by designing over 15 visually compelling electronic posters.
